

Candle Centerpieces

Supplies Needed:

- A round flat mirror
- 3 clear glass cylinder vases, different heights (you can find these at your local dollar store)
- 3 pillar candles that will fit inside your vases
- Sulyn Glitter (this glitter is green...not really, but it is made from 100% recycled material...including the packaging)
- White craft glue
- Tape
- Flat paintbrush or sponge brush

Instructions:

1. On each vase, tape off a section where you want to apply your glitter. Press the tape to the glass to be sure it is nice and tight. Leave a little tail of tape sticking up to grab later when you want to remove it.
2. Brush glue to cover the section. While the glue is wet, sprinkle silver glitter to cover it.
3. Carefully remove the tape while the glue is wet.
4. Let everything dry. Put the candles in the vases and the vases on the mirror.

Other options: You can make centerpieces for any occasion...birthdays, baby showers, anniversary parties and more. Just use different color glitters for a more festive feel. Add embellishments or ribbon to really spruce up your creation!
